

**Report on “Research Interviewing: Structured, semi-structured or in-depth?” seminar
Tuesday 6th August 2019
Universiti Teknologi PETRONAS (UTP), Seri Iskandar, Perak**

On Tuesday 6th August 2019, a 3-hour seminar was carried out in Universiti Teknologi PETRONAS (UTP). The speaker, Dr. Chong Su Li a Senior Lecturer in UTP and QRAM committee member, addressed the differences across the different kinds of interviewing methods that are used by social scientists. Emphasising on the importance of understanding the notions of research paradigms, Dr. Chong illustrated how the different types of interviews can be matched with their underpinning research design. The session saw a mix of structured lecture interspersed with lively questions from the audience. The session was also supported by Associate Professor Dr. Christy Gomez, another QRAM committee member who is from Universiti Tun Hussein Onn Malaysia (UTHM).

Approximately 60 participants were in attendance that day.
